DEDICATION	3
TABLE OF CONTENTS	5
INTRODUCTION	12
PREFACE	13
Having a Feel for the Weather	14
Understanding the Basics	14
Proximity—A Key Ingredient	15
Using This Book	16
Background Data	18
Our Approach at Sea	22
ACKNOWLEDGMENTS	24
Weather Reports	26
Stay In Touch	27
Register Your Book	27
Visit Us On the Internet	27
WHAT CREATES THE WEATHER?	29
Insolation	29
Effect on The Atmosphere	30
Global Weather Patterns	31
Seasonal Variations	32
Effects of Differences in Pressure	32
Coriolis Effect	33
Evaporation	34
Condensation	34
Weather on a Global Scale	35
Local Weather Patterns	37
Backing and Veering Winds	38
Wind Flow in Highs and Lows	38
FRONTS	40
Birth of a Depression	40
Warm Fronts	43
Cold Fronts	44
Frontal Speed	45
Occluded Fronts	46
Stationary Fronts	46
Secondary Depressions	46
ONBOARD PREDICTION	48
Wind Strength	48
Messages in the Clouds	50
The Barometer	50
Along the South African Coast	57
Wind Direction	59
Gust Factors	60
Data from Other Yachts	62
What the Waves Tell You	63
Anomalies	64
Finding Pressure Centers	64
READING THE CLOUDS	66
General Categories of Clouds	66
Cirrus	67
Cirrocumulus	68
Cirrostratus	69

TABLE OF CONTENTS

Altostratus	70
Altostratus	71
Stratus	71
Nimbostratus	71
Cumulonimbus	72
Cumulus	73
THE EXTRATROPICAL FORECASTING PROCESS	76
National Weather Service's Marine Prediction Center	76
Upper Level Conditions	78
Computer Modeling	79
Forecast Cycle	81
Budget Issues	82
When You're at Sea	83
Who Are the Forecasters?	84
SURFACE FORECASTS	90
Common Terms	90
RADIO FORECASTS	94
Antenna Selection	95
Onboard Interference	95
Band Conditions	95
Receiving Voice Forecasts	96
Nets and Weather Relays	96
THE WEATHER FAX	98
Dedicated Fax or Computer?	98
At the Beginning of a Passage	99
Symbols	100
Sample Fax Charts	103
Interpreting Surface Fax Charts	110
Compression Zones	114
Tropical and Subtropical Lows	115
Isobar Curvature and Wind Speed	116
FORECASTING IN THREE DIMENSIONS	118
3-D Low Structure	119
Divergence	122
3-D High Structure	122
Convergence	124
Upper-Level Westerlies	124
Meandering Upper-Level Winds	126
Ridges and Troughs	127
UPPER-LEVEL CHARTS	128
500mb Fax Charts	128
The Professional's View	130
Surface Weather Review	130
What Is a 500mb Contour?	131
Relative Heights	136
5,640-Meter Height Contour	138
Rules of Thumb	138
500mb Atmospheric Waves	139
Long Waves	139
Short Waves	140
Wave Interaction	140
Picking Out Waves	140
Short Waves and Surface Lows	145
Short Wave Trough Life Cycle	150
.....	150

TABLE OF CONTENTS

Short Wave Trough Interaction	151
Zonal Pattern	158
Streams of Flow	159
Meridional Pattern	160
Topographic Influences	162
Ridge Blocking Patterns	164
Cut-Off Lows	166
Making Use of 500mb Charts	168
When Isoheights Are Missing	168
In the Tropics	169
FORECASTING 500MB BEHAVIOR	170
Zonal to Meridional Transition	170
Meridional Behavior	170
Trough Axis Orientation	170
Cut-Off Low Triggers	171
Longer Term Weather Patterns	171
Using Cloud Patterns	171
Trough Axis Rotation	176
500MB RECAP	179
Surface to 500mb Offset	179
Zonal to Meridional Flow	180
Cut-Off Low Development	180
Ridge Blocking	180
Confirming 500mb Projections	181
THE JET STREAM	182
Jet Stream Components	183
The Jet Stream in Winter	183
Cloud Signatures	183
LOW PRESSURE TACTICS	193
“Normal” Depressions	194
N. Hemisphere Wind Direction	194
S. Hemisphere Wind Direction	196
Wind Strength	199
Sea State	199
Basic Decisions	200
.....	204
Favored Tack	205
Running Before a Depression	207
Favored Jibe	209
Reaching Across Depressions	210
BENT BACK WARM FRONTS	211
Frontal Structure	212
Warm Core	214
Satellite Images	215
Wind-Field Structure	215
Warning Signs	217
Avoidance Tactics	218
Christmas 1997	218
Cloud Signatures	222
QUEEN’S BIRTHDAY STORM	229
June 1, 1994	229
The Low Deepens	233
Tactics	235
What Should Have Happened?	238
A Meteorologist’s View	238

TABLE OF CONTENTS

Reality—Heart of Gold	241
Details	246
500mb View	250
500mb Hindsight	253
Was This a Bent Back Warm Front?	254
SQUALLS	256
Lapse Rates	257
Upper Atmosphere Requirements	259
Squall Watch	259
Predicting Squall Strength	260
Taking Advantage of the Wind	261
Getting Away from the Wind	264
Within the Squall	265
During the Day	266
Watch the Barometer	266
Line Squalls	266
Land-Generated Thunderheads	266
Thunder and Lightning	268
Microbursts	268
Clear-Air Microbursts	269
A Final Warning	269
AUCKLAND TO RAIVAVAI	270
Towards the Australs	270
An El Nino Year?	271
Using a Front to Start	272
Time to Go	272
Heading Offshore	274
In Retrospect	284
High-Seas Broadcast Weather	285
WEATHER AT ANCHOR	301
Rangiroa	301
CRUISING HIGHS	307
Circulation About a High	307
Keep an Eye on Development	308
Westerly Tradewinds	308
Highs are Rarely Stable	311
On Top of the High	312
Below the High	312
Unfriendly Highs	315
TROPICAL FORECASTING	316
Tropical Prediction Center	316
Tropical Synoptic Charts	317
TROPICAL CYCLONES	328
Storm Genesis	329
Tropical Waves	329
Organized Circulation	332
Maturation	335
Steering Currents	336
Risk of Recurving	336
Speed of Movement	337
Tropical Storm Geography	337
Tropical Storm Forecasts	341
Where to Get Forecasts	342
Seasons	344
Macro Forecasting Factors	347

TABLE OF CONTENTS

Saffir-Simpson Hurricane Scale	347
Recap	348
Life Cycle of a Hurricane	348
Diurnal Factors	351
Early Warning Signs	353
As the Storm Approaches	354
The Bar	355
Weather Fax Data	357
Dangerous Semicircle	358
Early Warning with Satellites	360
How Early Do You React?	365
THE DVORAK TECHNIQUE	366
Introduction	367
Development in General	372
Satellite Observations of Tropical Cyclones	372
Early Stages of Tropical Cyclogenesis	375
Curved Band (Coiling) Stage	377
Embedded Center Stage	379
Cloud-Pattern Variability	382
Arrested Development and Weakening	382
Additional Tropical Cyclone Cloud Patterns	384
Diurnal Effects	386
Cloud Patterns Associated with Tropical Cyclone Motion	386
A Model of Tropical Cyclone Development	387
HURRICANE AVOIDANCE TACTICS	396
Boat and Crew Factors	396
Sea Room	396
Sheltered Conditions	397
Finding the Storm Center	397
Establishing the Storm Track	400
Navigable Semicircle	409
Courses of Action	413
Equator Side of the Storm Track	416
Passaging in Hurricane Season	416
USING A WEATHER ROUTER	417
Communications	419
Costs	420
Discussing Your Needs	420
Trade-offs	421
Performance Factors	422
NUKA HIVA TO SAN DIEGO	423
Nuka Hiva	423
Tactics	426
Hurricane Linda	428
Depression 15E	432
Tropical Storm Marty	435
Nora Matures	445
Approaching the Coast	448
HURRICANE NORA	453
San Juanico	453
Heading North	455
The Barometer Plummets	457
Reaching on Starboard Tack	458
In Hindsight	459
Outside Information	460

TABLE OF CONTENTS

Transition Mechanics	471
TROPICAL TO EXTRATROPICAL TRANSITION OF HURRICANES	471
Warning Signs	472
Speed of Movement	472
Tactics	473
Seasonal Issues	473
HURRICANE DANIELLE	475
September 1, 1998	477
September 2	479
September 3	481
September 4	483
Tactics	486
SURFACE PROG CHARTS	488
North Pacific	488
TYPHOON STELLA	491
September 16, 1998	492
September 17	494
September 18	496
September 19	498
500MB PROG CHARTS	501
RETURN FROM HAWAII	502
Leaving Port	503
Making Northing	504
Cutting Across the High	505
FOG	509
Advection/Sea Fog	510
Where Do You Find Sea Fog?	510
Forecasting Sea Fog	510
Radiation Fog	511
Using a Sling Psychrometer	512
NEAR LAND	513
Land Mass Compression	513
The Sea Breeze	514
Down-slope (Katabatic) Winds	517
Headlands	518
Special Acceleration Situations	520
Long Narrow Bays	520
Coastal Tactics	520
Holes in the Wind	522
SPECIAL SITUATIONS	523
South Africa	523
Coastal Tactics	526
The Gulf Stream	529
Thermal-Based Weather	529
Current	529
Cape Hatteras Weather	530
Gulf Stream Crossing Tactics	531
CRUISE PLANNING	536
Philosophy	536
Atypical Weather Patterns	536
Pilot Charts	537
Sailing Directions	538
Equinoctial Gale Season	538
Tropical vs. Mid-Latitude Storms	539
Tropics	539

TABLE OF CONTENTS

Against the Trades	540
High Latitudes	541
Mid-Latitude Considerations	541
Extreme Temperature Gradients	541
Hurricane Seasons	542
The Herd Mentality	542
Playing the Odds	543
Long-Term Cruising	543
THE ITCZ (DOLDRUMS)	544
Crossing Tactics	544
What to Expect	544
Using Radar	545
TROPICAL AND EXTRATROPICAL STORM SIZE COMPARISON	547
WEATHER WINDOWS	549
Boat Speed	549
Know Your Capabilities	549
Weather System Speed	549
Relative Direction	550
Defining a Good Window	550
U.S. East Coast Departure	551
WORKING WITH LOCAL FORECASTERS	556
Risk Assessment	556
Weather Cycles	557
Unusual Local Conditions	557
Discussing Weather Windows	557
SEVERE WEATHER REVIEW	558
Tropical Review	559
Extratropical Review	559
