DEDICATION .....	3	Boat Heel .....	48
INTRODUCTION .....	13	Weather Helm .....	49
Prioritize Your Time .....	13	Steering Control .....	49
Defensive Seamanship .....	13	Keel Load .....	49
Staying Current .....	14	Wind Shear .....	49
Crew Size .....	15	MAINTAINING PERFORMANCE .....	51
Check Lists .....	16	Up in the Lulls, Down in the Puffs .....	51
Stay In Touch .....	16	Tradewind Cycles .....	52
Register Your Book .....	16	Closer to Shore .....	52
Visit Us On the Internet .....	16	The Vang .....	52
Priorities .....	16	SAIL TRIM .....	54
ACKNOWLEDGEMENTS .....	17	Headsails .....	54
<b>PREPARATION.....18</b>		Mainsail .....	55
PRE-DEPARTURE SURVEY .....	18	USING TELLTALES .....	56
Access .....	18	Setting Up the Jib .....	56
Steering Gear .....	18	Sailing to Jib Telltales .....	57
Through-Hull Fittings .....	19	Mainsail Telltales .....	58
Self-Steering .....	19	Spinnaker Indicators .....	60
Propulsion Machinery .....	20	CONTROLLING SAIL SHAPE .....	60
The Rig .....	20	Mainsail .....	60
Sails .....	25	Headsails .....	61
Chafe .....	26	SAILING UPWIND .....	62
Running Rigging .....	27	Sail Selection .....	62
Deck Hardware .....	29	Headsail Trim While Beating .....	63
Lifeline Systems .....	29	Mainsail Control .....	63
Safety Gear .....	29	Steering Technique .....	64
Ground Tackle .....	30	Steering Indicators .....	64
Checking for Leaks .....	31	Working the Wind Shifts .....	65
Bilge Pumping .....	32	Sailing to Target Boat Speed .....	65
Securing the Interior .....	33	Windvane Settings .....	66
Electronics .....	33	Using the Autopilot .....	66
SHAKEDOWN CRUISE .....	34	Coordinating With Sail Trim .....	67
Mechanical Systems .....	34	Helm Balance .....	67
Loading the Engine .....	34	Waiting Out the Weather .....	67
Maintenance Procedures .....	35	Avoiding Waves .....	68
Sail Trials .....	36	TACKING .....	72
Rig Tune .....	36	Hydrodynamic Issues .....	72
After a Couple of Days .....	37	Working the Sheets .....	73
Electronics .....	37	Tacking Techniques .....	74
Cockpit Drains .....	37	In Heavy Airs .....	74
Leaks (Again!) .....	38	In Big Seas .....	75
CLEARING THE DECKS .....	39	In Irons .....	75
Don't Compromise Your Stability .....	39	REACHING .....	76
Headsail Change .....	40	Mainsail Trim .....	76
Don't Procrastinate! .....	41	Headsail Selection .....	77
HOW THE PROS DO IT .....	42	Reaching Headsail Trim .....	77
THOMAS PERRY .....	42	Twin Headsail Reaching .....	78
Getting Ready to Head to Sea .....	42	Steering Technique .....	78
Safety First .....	43	BROAD REACHING AND RUNNING .....	80
Advice for Those Just Starting Out .....	43	Sheeting to the Main Boom .....	80
<b>BOAT HANDLING.....44</b>		Single Headsail to Weather .....	81
SHORTENING THE LEARNING CURVE .....	44	Twin Headsails Downwind .....	83
SPEED .....	45	Free-Flying Headsails .....	84
Current vs. Boat Speed .....	46	Main Boom Sheeting Angle .....	84
Weather Avoidance .....	46	Scandalizing the Mainsail .....	85
Speed/Length Ratios .....	46	STEERING AT BROAD ANGLES .....	85
PERFORMANCE-AFFECTING FACTORS .....	47	Design Issues .....	85
Cruising Displacement .....	47	Steering Technique .....	85
Sail Inventory .....	47	Impact of Sea State .....	86
Underwater Condition .....	47	Using Wind Shifts .....	86
		Setting Self-Steering .....	86

## TABLE OF CONTENTS

Cross Chop Issues .....	87	Prop Cavitation .....	128
As the Wind Increases .....	87	Running Rigging in the Prop .....	128
JIBING DOWNWIND .....	88	SAILING IN TIGHT QUARTERS .....	129
Extra Distance vs. Speed .....	88	Rig Configuration .....	130
Wind and Wave Factors .....	88	Cabo San Lucas .....	131
JIBING THE MAIN .....	89	Using Sails to Help Steer .....	132
Reducing Jibing Loads .....	89	Pre-Planning .....	132
SPINNAKERS .....	91	Anchors Ready .....	132
When to Use a Spinnaker .....	91	Working in Close to Land .....	133
Setting the Spinnaker .....	92	East London .....	133
Spinnaker Trim .....	93	Setting the Hook .....	135
Asymmetric Chutes .....	96	Anchor Size .....	135
Twin-Pole Jibing .....	99	Room to Leeward .....	135
Single-Pole Jibe .....	99	“Average” Boom Position .....	136
Hourglasses .....	100	Sailing Bare Headed .....	136
Headstay Wraps .....	100	BACKING DOWN UNDER SAIL .....	137
Spinnaker Takedown .....	101	The Backstaysail .....	137
Emergency Release .....	101	Split Rigs .....	137
HANDLING THE SPINNAKER POLE .....	102	Steering in Reverse .....	137
Mast-Mounted Systems .....	102	Using the Mainsail .....	137
Setting the Pole .....	103	Backwards in New Zealand .....	138
Dropping the Pole .....	104	Getting the Bow to Pay Off .....	139
SAILING BY THE LEE .....	105	SAILING OUT THE ANCHOR .....	140
PREVENTERS .....	106	Favored Tack .....	140
SURFING .....	108	Beating in Tight Quarters .....	141
Wave Mechanics .....	109	When It Is Blowing .....	141
Surfing and Hull Shape .....	109	Using Just the Jib .....	141
Steering Control .....	109	KEN ARGENT .....	142
The Role of Displacement .....	109	Watch Standing .....	142
Sail Area .....	111	Weather Routing .....	142
Helming in Higher Performance Boats .....	112	First Sail of the Season .....	143
Helming Technique in Heavy Boats .....	113	<b>WORKING ON DECK.....146</b>	
WHEN IT IS TIME TO REEF .....	114	SAFETY AT SEA .....	147
Reefing the Main .....	114	Use a Safety Harness .....	147
Sail Slides or Bolt Rope? .....	116	Tethers .....	148
Watch that Boom .....	116	Connection Points .....	148
Sail Ties .....	116	Handholds .....	149
Roller Reefing Jibs .....	116	Working the Deck .....	150
FULLY BATTENED MAINS .....	118	Don’t Stand in a Bight of Line .....	150
Hardware Considerations .....	118	Shoes .....	151
Hoisting .....	118	Toerail .....	151
Sailing with a Fully Battened Mainsail .....	118	THE FOREDECK .....	152
Dropping the Main .....	119	Halyards .....	152
BEING COMFORTABLE AT SEA .....	120	Mast Preparation .....	153
Do Not Overpower .....	120	Making up Halyards .....	153
Going to Windward .....	121	Sail Preparation .....	153
Pinching Up .....	122	Foredeck Netting .....	154
Downwind Comfort .....	122	Night Preparation .....	154
Picking the Best Speed .....	122	Basic Safety Precautions .....	155
Reducing Yaw Downwind .....	122	Handling Headsails .....	155
In a Leftover Sea .....	123	Downwind Sail Changes .....	156
Oversheeting to Reduce Rolling .....	123	Changing Roller-Furled Jibs .....	157
Picking a Comfortable Course .....	124	Upwind Foredeck Work .....	158
Light and Sloppy .....	125	Sail Overboard .....	159
MOTORSAILING .....	126	HANDLING RUNNING RIGGING .....	160
Range under Power .....	126	Avoid Overload .....	160
Downwind Motorsailing .....	127	Effects of Rope Construction .....	160
Upwind Motorsailing in Light Airs .....	127	Bitter Ends .....	160
Upwind Motorsailing in Heavy Conditions ...	128	Coiling Lines .....	161
Special Considerations .....	128	Flaking .....	161

## TABLE OF CONTENTS

---

Using Manual Winches .....	162	Nature Calls .....	196
Easing under High Load .....	162	Keep a Close Watch Near Land .....	196
Overrides .....	162	MALAKULA ISLAND .....	197
Hockles and Twists .....	163	Shallow Water .....	197
Powered Winches .....	164	Environmental Protection .....	199
Jammers and Clutches .....	165	FLOTSAM .....	201
Emergency Release .....	165	Precautions .....	201
KNOTS .....	166	Warning Signs .....	201
Using High-Tech Line as Shackles .....	169	Containers .....	202
Rope End Details .....	170	AT NIGHT .....	202
GOING ALOFT .....	172	Night Lights .....	203
Overcoming Anxiety .....	172	<i>Bona</i> .....	203
Bo's'un's Chair .....	172	Peripheral Vision .....	204
Secondary Support .....	173	Atmospheric Conditions .....	204
What to Take .....	173	How Far Can You See? .....	205
Is the Spar Secure? .....	174	Using Binoculars at Night .....	205
Setting up Halyards .....	174	Spotlights .....	205
Motion Aloft .....	175	Night Scopes .....	206
Turning Blocks .....	175	FISHING TRAFFIC .....	207
Pre-Planning .....	176	Inshore .....	207
Hoisting .....	176	Offshore .....	208
On Your Own .....	176	TUGS AND TOWS .....	209
Working up the Mast .....	176	THE INNER SENSE .....	210
At the Masthead .....	176	Focus Indirectly .....	211
Deck Crew .....	177	Sound .....	211
Communicating from Aloft .....	177	<i>Yachting One-of-a-Kind Regatta</i> .....	211
Coming Down .....	177	Smell .....	213
Dealing with an Override .....	177	Structural Sounds .....	213
At Sea .....	178	Motion Signals .....	213
COMMUNICATING ON DECK .....	179	Vibration .....	213
Steering under Power .....	180	BREAKING IN CREW .....	214
Sail Trim Signals .....	181	Lifestyle .....	214
Docking Signals .....	181	On Deck .....	215
At Night .....	181	Emergencies .....	216
Concentration Is Required .....	181	Standing Watch .....	216
STAYING FIT .....	182	OFFSHORE VISIBILITY .....	217
On Shore .....	182	Radar Visibility in Sea Clutter .....	217
On Board .....	183	Daylight .....	218
Keeping Track .....	183	Running Lights .....	219
SKIP ALLEN .....	186	Northeast Channel .....	219
Single-handed Issues .....	186	AVOIDING COLLISION .....	220
Weather .....	187	Night Watch .....	220
When You Are Just Starting Out .....	187	Daytime Interpretation .....	222
<b>WATCHKEEPING.....188</b>		Relative Bearings .....	222
BASIC WATCH SYSTEMS .....	189	Altering Course .....	223
Three-Hour System .....	189	How to Read Steaming Lights .....	223
Kids Can Help Too .....	189	Using Radar to Define Collision Threats .....	227
At Night .....	189	Talking to Ships .....	230
Staying Awake .....	190	In Heavy Traffic .....	230
Snacks .....	191	Narragansett Collision .....	230
Entertainment .....	191	On Reflection .....	232
Getting Back to Sleep .....	191	RULES OF THE ROAD .....	233
RADAR FOR WATCHKEEPING? .....	192	Basic Rules .....	233
Radar Alarms .....	192	Between Sailing Vessels .....	234
Weather Alert .....	194	Between Powered Vessels .....	234
Gain Settings .....	194	Between Power and Sail .....	235
Catnapping .....	194	Signaling .....	235
Security Issues .....	194	Suction Effect When Passing .....	235
STAYING ALERT .....	195	EXPECT THE UNEXPECTED .....	237
Suvorov .....	195	Company .....	238

## TABLE OF CONTENTS

Course Change .....	238	Navigational Skills .....	275
Impact .....	238	Dedicated Plotter or Laptop Computer? .....	275
Cleaning Up .....	239	Hardware Issues .....	275
In Hindsight .....	239	Charts .....	276
TONGA TO FIJI .....	239	Operating System .....	276
Worst Position Plot .....	240	Software Features .....	277
Moon Shot .....	240	GPS Connection—Datum .....	278
Reef Ahead! .....	241	Autopilot Connection .....	278
Lessons Learned .....	242	Using the System .....	279
REMINDER—STAY ALERT .....	243	TIDES .....	281
BRUCE GOODHUE .....	244	Celestial Influence .....	281
Emergency Planning .....	244	Springs and Neaps .....	281
Working with Crew .....	244	Declination of the Moon .....	282
PHIL WADE .....	245	Semidiurnal Tides .....	282
Watchstanding .....	245	Diurnal Tides .....	283
General Seamanship .....	245	Mixed Tides .....	283
<b>NAVIGATION.....246</b>		Sun Tides .....	283
MOONSHADOW .....	246	Datum .....	283
Landfall in the Tuamotus .....	247	TIDAL CURRENTS .....	284
Heading West .....	247	In Restricted Areas .....	284
Change of Watch .....	249	Current Flow and Tidal Range .....	284
What Went Wrong .....	250	Playing the Currents .....	284
NAVIGATION IN THE AGE OF GPS .....	252	Darwin, Australia .....	285
Chart Accuracy .....	252	KEEPING TRACK .....	288
Plotting .....	254	The Logbook .....	288
Dead Reckoning .....	255	Entry Data .....	288
Lines of Position .....	256	Weather Trends .....	290
Current .....	256	Onboard Conditions .....	290
Leeway .....	256	Using the Data .....	290
Interpreting Charts .....	257	CELESTIAL NAVIGATION .....	291
Buoyage .....	257	What to Learn .....	291
PASSAGE TO AUCKLAND .....	258	Hardware .....	291
Hindsight .....	261	JUBILATION .....	292
PASSAGING LOGIC .....	262	<b>CLOSING WITH SHORE.....294</b>	
What Speed Can You Expect? .....	262	SEA ROOM .....	295
Towards Ndina .....	263	Temperate Weather .....	295
Moonlight .....	263	Inclement Weather .....	295
Tidal States .....	264	Navigational Issues .....	296
Underwater Features .....	264	If There Is No Choice .....	296
Landfall Considerations .....	264	Topographical Analysis .....	297
NAVIGATION AIDS .....	265	Harbor Entrance Conditions .....	298
Rules for Defensive Navigation .....	265	Position Fixing .....	298
Pilotage Data .....	265	Crew and Vessel Capability .....	299
Backing Up Electronics .....	266	Maintain Sea Room! .....	299
RADAR NAVIGATION .....	267	SIGNS OF APPROACHING LAND .....	300
Factors Affecting Radar Image Quality .....	267	Smoothed Seas .....	301
External Factors .....	267	Reflected Waves .....	302
Building Your Skill Level .....	268	Crossing Patterns .....	302
Tuning and “Gain” .....	268	Current Variation .....	302
Electronic Target Enhancement .....	269	Debris .....	302
Range .....	269	Bird Life .....	302
Adjusting for Sea Clutter .....	270	Hearing .....	302
Rain Suppression .....	271	Smell .....	303
Interference Rejection .....	271	Temperature .....	303
Side Lobes .....	271	Clouds .....	303
Interpreting Topography .....	272	The Loom of Lights .....	304
Turning Radar On and Off .....	272	PILOTING IN FOG .....	304
Don’t Forget To Look On Deck! .....	272	Navigation Issues .....	305
ELECTRONIC CHARTING .....	274	Picking the Right Speed .....	305
Why Use Electronic Charting? .....	274	Keeping Watch .....	305

## TABLE OF CONTENTS

Viewing Angles vs. the Sun .....	306	CRUISING WITH ICE .....	354
Making Yourself More Visible .....	306	Never Run at Night .....	356
ENTERING HARBORS AT NIGHT .....	307	Ice Forecasting .....	357
Lay of the Land .....	307	Big Bergs .....	357
Slowing Down for the Approach .....	308	Pack Ice .....	358
At First Light .....	308	Using Radar .....	358
If It's the Lesser of Two Evils .....	309	Types of Ice .....	359
What if You Strand? .....	309	Icebergs .....	359
Reading Shore Lights .....	310	Tactics in Ice .....	359
APPROACH TO PORT SANDWICH .....	310	Carry a Spare Prop .....	360
Heading In With Depthsounder and Radar .....	311	Hull Shape .....	360
EYEBALL NAVIGATION .....	312	Using Prop Wash .....	361
Equipment .....	313	Waterpump Impellers .....	361
Visibility Factors .....	313	Offshore Ice .....	361
Sun Angle .....	314	Warning Signs .....	361
Weather Issues .....	315	Bergy Bits .....	361
Towards Blue Lagoon .....	316	Iceberg Drift .....	362
Interpreting Cloud Shadow .....	319	HARD CORE CRUISING WITH ICE .....	362
Bottom and Coral Formation .....	319	The Right Clothing .....	362
Determining Water Depth .....	319	NEVER TAKE ANYTHING FOR GRANTED .....	364
CORAL PASSES .....	321	Using Your Senses .....	365
Current .....	321	Knowledge Standards .....	365
Breaking Seas .....	322	<b>ANCHORING.....366</b>	
Downwind Passes .....	322	CABO SAN LUCAS .....	367
Choice in Passes .....	322	Sea Wren's Song .....	373
Inside the Pass .....	323	Lessons .....	374
Exiting (Downcurrent) .....	324	ANCHORING STRATEGIES .....	376
MALAITA ISLAND .....	324	Anchor Types .....	376
Celestial Issues .....	324	Carry an Assortment of Anchors .....	377
Cloud Cover .....	325	Storm Hooks for Everyday Use .....	377
Pre-Departure Once-Over .....	326	Bottom Conditions .....	378
Water Clarity .....	326	Scope .....	379
Underway .....	327	Reducing Scope Requirements .....	382
Tidal State .....	327	Super-Soft Bottoms .....	383
WHEN IN DOUBT, DON'T! .....	328	Access to Shallow Anchorages .....	383
WHEN YOU CAN'T SEE THE BOTTOM .....	331	Raiatea .....	384
Surface Signs .....	331	Determining Rode Length .....	386
Currents .....	331	Twin Anchors .....	386
Water Color .....	332	Two Anchors in Line .....	389
Debris Fields .....	333	Bow and Stern Hooks .....	389
Going around Curves .....	334	Wind on the Beam .....	390
Watch the Critters .....	334	Bahamian Moor .....	390
Buoyage and Markers .....	335	Current against Wind .....	391
Using Ranges .....	335	PICKING THE RIGHT SPOT .....	392
If You Are Unsure .....	336	Room to Set and Swing .....	392
Feeling Your Way .....	336	Other Vessels .....	393
CROSSING A BREAKING BAR .....	337	Traffic .....	394
Current State .....	337	Fetch .....	394
Tidal Influences .....	337	Open Anchorages .....	394
Wave Height and Period .....	337	Bugs .....	394
Bottom Condition .....	338	Keeping Cool .....	394
How Will Your Hullshape Do? .....	338	Generator and Engine Exhaust .....	394
Preparation .....	338	Etiquette .....	394
Judging Wave Patterns .....	339	Privacy .....	395
Watch the Locals .....	339	Bottom Contour .....	396
Technique in the Break .....	340	Getting Out of the Swell .....	398
Inside Looking Out .....	340	SETTING THE HOOK UNDER POWER .....	400
Worst Case Scenario .....	340	How Much Engine? .....	400
More on Current .....	342	Feeling the Rode .....	400
Knysna Lagoon .....	342	MOORINGS .....	401
Pacific Northwest .....	344		

## TABLE OF CONTENTS

ANCHORING IN CORAL .....	402	On-Deck Preparation .....	439
Finding a Clear Spot .....	402	AL & BETH LIGGETT .....	440
Is the Anchor Really Dug In? .....	402	Guam .....	440
Special Issues inside Lagoons .....	403	Cat's Cradle .....	441
Use Chain .....	404	Line Adjustment .....	442
Anchoring to a Coralhead .....	404	Chafe Protection .....	442
ANCHORING OUTSIDE TROPICAL REEFS .....	405	Adjusting under Load .....	443
Tikei .....	406	Cleaning Up on Deck .....	443
Anchoring Technique .....	407	Typhoon Omar .....	443
Keeping Watch .....	407	Biggest Concerns .....	444
RAFTING .....	408	RICHARD LE QUESNE .....	446
ANCHORING WITH EXTREME TIDES .....	409	The Meaning of Seamanship .....	446
ANCHOR WATCH .....	410	Heavy Weather Tactics .....	446
Position Fixing .....	410	What to Learn .....	447
Before Settling Down .....	410	SAFETY ISSUES .....	448
Electronic Anchor Watch .....	412	<b>DINGHY SEAMANSHIP.....448</b>	
Telltale Compass .....	412	SAFETY .....	469
Wind Alarm .....	412	Staying in the Boat .....	449
IF CONDITIONS DETERIORATE .....	412	Keeping Upright .....	449
Talking with Your Neighbors .....	412	Righting a Swamped Boat .....	450
Setting a Second Anchor .....	413	Preparing for the Worst .....	451
Using the Engine .....	413	Avoiding Collisions .....	452
Risks from Other Vessels .....	413	Running at Night .....	452
Slipping the Anchor .....	414	Nantucket Fog .....	452
SPECIAL PRECAUTIONS .....	415	SMALL BOAT HANDLING .....	453
Shock Absorbers .....	415	Rowing and Sculling .....	453
Rode Chafe .....	416	Outboard Basics .....	454
Rapid Anchor Deployment .....	416	Shallow Water .....	454
Anchor Lights .....	417	Choosing the Right Course .....	454
RIDING SAILS .....	417	Broaching .....	455
Sailing at Anchor .....	418	Anchor Out? .....	455
Using a Riding Sail .....	418	Rough Docks .....	455
Full-length Battens—A Must .....	419	KIDS AND DINGHIES .....	456
ROLL CONTROL .....	420	TAKING THE DINGHY THROUGH SURF .....	457
Flopper-Stopper .....	420	Picking the Right Set .....	457
Rigging the Flopper-Stopper .....	421	Hard Dink Design .....	458
Using a Bucket .....	422	Powered Inflatables .....	458
Sailbags .....	422	Bottom Contour .....	459
Air Stabilizers .....	423	Viewing Angle .....	460
Anchor Rode Bridles .....	423	Technique .....	460
LEAVING THE BOAT .....	424	Jalapa, Mexico .....	460
Short Trips Ashore .....	424	Marquesan Surfmanship .....	461
A Few Days Away .....	424	The Polynesian Technique .....	462
Long Term .....	425	Beach Break .....	463
Making Up a Mooring .....	425	Just-in-Case Preparations .....	463
Choosing a Marina .....	427	TOWING .....	464
Caretakers .....	427	Design Consideration .....	464
RETRIEVING THE ANCHOR .....	428	Towing Power .....	464
In a Blow .....	428	Towing Downwind .....	465
Powering Up .....	428	Towing Rules .....	466
Winching .....	429	The Bridle .....	466
FOULED ANCHORS .....	429	Hard Bottom Inflatables .....	467
Coral Fouls .....	429	How Far Astern Do You Tow? .....	467
Tripping the Anchor Free .....	430	<b>UNDER POWER.....468</b>	
Diving On the Anchor .....	431	DESIGN ISSUES .....	469
Diving in Murky Waters .....	433	Propeller Action .....	469
HURRICANE AT ANCHOR .....	434	Prop/Rudder Relationship .....	470
Where Do You Shelter? .....	437	MANEUVERING CHARACTERISTICS .....	471
Securing the Boat .....	437	Pivot Point .....	471
Anchoring Considerations .....	438		

## TABLE OF CONTENTS

Turning Radius .....	471		
Stern Swing .....	471		
Center of Lateral Resistance .....	471		
Sideways Drift .....	472		
Downwind Drift Rate .....	473		
Head-to-Wind Station Holding .....	473		
Stern Walk .....	473		
How Fast Can You Stop? .....	475		
<b>TECHNIQUES UNDER POWER .....</b>	<b>476</b>		
Rotating .....	476		
Using the Wind to Turn .....	478		
Backwards .....	479		
Steering in Reverse .....	479		
Tight Channels .....	480		
Practice .....	481		
Pre-Planning .....	481		
<b>PREPARING TO DOCK .....</b>	<b>482</b>		
Types of Docklines .....	482		
Rigging .....	482		
Throwing Techniques .....	483		
Cleats or Winches? .....	483		
Proper Cleating .....	483		
Bow and Stern Lines .....	484		
Spring Lines .....	484		
Breast Line .....	484		
Line Handlers Ashore .....	485		
Which Lines First? .....	485		
Controlling Lines under Load .....	485		
Fenders .....	486		
<b>DOCKING .....</b>	<b>487</b>		
Stern Torque .....	487		
Bow or Stern First? .....	489		
Wind Pushing On .....	489		
Wind Pushing Off .....	490		
Using Current .....	490		
Between other Boats .....	490		
Rafting .....	491		
Against Pilings .....	492		
Between Pilings .....	492		
Prop Wash Against the Rudder .....	493		
<b>GETTING OFF THE DOCK .....</b>	<b>493</b>		
Short-Handed Tips .....	493		
Springing Off .....	493		
Rotating Direction On the Dock .....	494		
Using an Anchor .....	494		
<b>MOORING MEDITERRANEAN-STYLE .....</b>	<b>497</b>		
Med Moor Preparation .....	498		
Anchor Selection .....	498		
Rigging a Trip Line .....	499		
Backing Tactics .....	499		
Clear Communication .....	501		
Securing the Stern .....	501		
<b>THE DINGHY AS A TUG .....</b>	<b>503</b>		
Dink Alongside .....	503		
Towing .....	503		
Steering .....	503		
Stopping .....	503		
Inflatables with Large Engines .....	504		
		<b>WEATHER.....506</b>	
<b>WHAT TO LEARN .....</b>	<b>507</b>		
Analyzing Risk Factors .....	507		
Bora Bora to Suworov .....	508		
Pattern Recognition .....	510		
Using the Internet .....	510		
Air Masses .....	511		
Three-Dimensional Atmosphere .....	511		
Surface Lows .....	511		
Surface Highs .....	512		
New Zealand to New Caledonia .....	512		
Frontal Boundaries .....	515		
Wind Issues .....	515		
500mb Weather .....	516		
<b>STAYING AHEAD OF THE CURVE .....</b>	<b>516</b>		
Navigational Constraints .....	517		
Coastal Passages .....	518		
Picking Your Window .....	518		
Revolving Storms .....	518		
Using the Barometer in the Tropics .....	519		
Storms which Change Structure .....	519		
Secondary Lows .....	520		
Baroclinic Storms .....	520		
<b>TACTICS .....</b>	<b>520</b>		
<b>BERMUDA TO NEWPORT .....</b>	<b>521</b>		
St. David's Harbor .....	521		
Ready to Roll .....	523		
En Route .....	525		
Gulf Stream Crossing .....	533

## TABLE OF CONTENTS

Hull Material .....	566	Lessons from the Rescue .....	604
Keel Shape .....	567	Search Times .....	605
Super Structure .....	568	Visibility in the Water .....	605
Displacement .....	568	Lifejackets .....	605
The Decision-Making Process .....	568	GPS Position .....	606
Tidal Factors .....	569	Accidents Happen .....	606
Maintaining Watertight Integrity .....	569	HYPOTHERMIA .....	606
Weather Impact .....	569	Keep On Your Clothing .....	607
Lightening the Boat .....	569	Heat-Lessening Posture .....	607
Increasing Heel .....	570	Swim or Float? .....	607
Salvage Equipment .....	571	Thermal Protection .....	607
Special Equipment for Coral .....	572	Recovery .....	607
<i>Pagan Lee</i> .....	572	Staying Alive In the Water .....	608
<i>Arion III</i> .....	574	PROP FOULS .....	609
LEGAL ISSUES .....	577	Clearing a Foul .....	609
SALVAGE WITH OUTSIDE ASSISTANCE .....	578	ABANDON-SHIP PREPARATION .....	610
Towing Bridles .....	578	Abandon-Ship Drill .....	611
Dealing with Obstructions .....	578	ABANDON-SHIP SUPPLIES .....	612
Breaches in the Hull .....	578	Short Term .....	612
<i>Moonshadow</i> .....	579	Medium Term .....	613
TOWING .....	581	Long Term .....	613
Towing Bridles .....	581	Miscellaneous Gear .....	613
Shock Absorbers under Tow .....	582	<b>MAINTENANCE.....614</b>	
Communication with the Tow Boat .....	582	REPAIR RULES .....	615
Picking the Right Speed to Tow .....	583	Look for the Simple Answer .....	616
Tow Length .....	583	Take Your Time .....	616
Towing in Close Quarters .....	583	When to Start Disassembly .....	616
Keep Propellers Clear .....	584	Use Judicious Force .....	616
Safety Issues .....	584	WHAT TO LEARN .....	617
Using Anchor Windlasses .....	584	Electrics .....	617
Steering the Towed Boat .....	584	Pumps .....	617
STEERING FAILURE .....	585	Diesels .....	617
Emergency Tillers .....	585	Refrigeration .....	617
Rudder Control Lines .....	586	Mast Tuning .....	618
Bent Rudder Shaft .....	586	Basic Sail Repair .....	618
The Right Tools .....	586	THE TOOL KIT .....	619
Unorthodox Approaches .....	587	Basic Kit .....	620
Rudder Loss .....	587	Intermediate Kit .....	620
RIGGING A SWEEP .....	588	Complete Kit .....	620
Rudder Failure .....	588	Special Tools .....	621
Building the Sweep .....	588	Welding and Brazing .....	621
Rigging Details .....	588	DON'T SAIL ON FRIDAYS .....	622
HULL DAMAGE .....	591	Water in the Engine .....	623
MAJOR LEAKS .....	593	The Mother of All Injector Battles .....	624
FIRE .....	594	Possible Sources of Water in the Engine .....	624
Reducing Fire Hazards .....	594	What to Do if the Engine Floods .....	624
If You Smell Smoke .....	595	Stuck Injectors .....	625
Using Fire Extinguishers .....	595	Change the Oil .....	625
OVERBOARD .....	596	HAMISH AND KATE LAIRD .....	626
Personal Gear .....	596	Petermann Island, Antarctica .....	626
Man-Overboard Procedure .....	597	The Meaning of Seamanship .....	630
Quick Stop .....	597	Design Philosophy .....	630
Using a LifeSling .....	599	Preparation .....	632
Bringing the Victim Aboard .....	599	Maintenance .....	632
IF YOU'RE IN THE WATER .....	601	Pre-Passage .....	633
